

## Daily Stand Up(09/14)

### • What did you do yesterday?

**Darian:** Worked on categories bar backend

**Matthew:** researched/ wrote rough code for pulling form dynamo and editing tables

**Allen:** Worked on adding more functionality to createlisting

**Justin:** Worked on the backend of our “create listing” database and was able to send info to our database

**Max:** Made components for all the buttons on the home page and routed them accordingly. Also moved all public files that should be in protected to protected.

### • What will you do today?

**Darian:** Research backend

**Matthew:** get unique user’s full profile

**Allen:** Research/understand frontend

**Justin:** Connect the front end with the backend and send in information into our database

**Max:** Research using custom icons for buttons, start building profile page UI.

### • What is blocking your progress?

**Darian:** Not knowing enough about backend

**Matthew:** All testing is on the backend so some changes will have to be done when frontend is working

**Allen:** Not knowing enough about frontend

**Justin:** Right now we are able to send postman POST requests to our API but we cannot send POST request via the front end.

**Max:** Lack of knowledge on downloading and implementing icons with Angular.
