Daily Stand Up(09/6)

• **What did you do yesterday?**
Darian: Researched how to make a categories bar.
Matthew: Finished register by also checking if an email is already in use
Allen: Research how to do post request on creating listing
Justin: Finish implementing drag and drop images into "Create a listing"
Max: Research how to detect incorrect password/username

• **What will you do today?**
Darian: Begin building the basic UI for categories.
Matthew: start profile backend
Allen: Finish implementing createlisting.js
Justin: Fix minor UI changes inside "Create a listing" and the home navigation bar. Also try to display "Listings" inside our homepage
Max: Implement incorrect password/username feature

• **What is blocking your progress?**
Darian: Need more information on how to make category bar look good.
Matthew: no profile page created/ don't know how to integrate s3 buckets with dynamo
Allen: Didn't know how to send post request without user input from front end
Justin: The backend for create a listing is not done so the info is not in the database.
Max: Lack of typescript knowledge
