Daily Stand Up(09/11)

• What did you do yesterday?
Darian: I finished up the categories bar UI
Matthew: created rough profile backend that allows upload of an image to a s3 bucket
Allen: tried to get create listing post request working
Justin: created a lambda template for the create listing
Max: Made some adjustments to the layout of the home page

• What will you do today?
Darian: Research backend
Matthew: finish the rest of profile backend that allows the edit of the table/get user profile
Allen: tried to get create listing post request working
Justin: create the home bar as its own component so it is easily portable to other components
Max: Start working on the profile page.

• What is blocking your progress?
Darian: Not knowing enough about APIs
Matthew: no profile frontend so all testing is purely backend
Allen: create listing post request not working
Justin: learning about the backend and all the protocols to connect the AWS system.
Max: The home page not being "protected".
